

PCA plot showing the distribution of 28 plant species (labeled with numbers) along the first two dimensions (Dim1 and Dim2). The x-axis is Dim1 (53%) and the y-axis is Dim2 (32%). The plot is divided into two regions by a red line, representing the 'Control' group (left) and the 'Treated' group (right). The 'Control' group is represented by a red shaded triangle, and the 'Treated' group is represented by a blue shaded triangle. The 'Control' group is clustered on the left, while the 'Treated' group is clustered on the right.
